

Effective: January, 2014

SCHEDULE SDP
Small Demand Power Rate 40 kW to 99 kW in load

AVAILABILITY

Available to customers requiring greater than 40 kW or more of demand capacity in 1 or more months within a year and located on or near Seller's lines or more than 60 kVa of transformer capacity. This rate schedule is for non-farm loads, subject to District's established rules and regulations. Farm loads may be qualified or required on this rate on a case by case basis.

TYPE OF SERVICE

Single-phase or Three-phase, 60 cycle, at Seller's standard voltages.

RATES:

Customer Charge	Summer \$50.00	Winter \$50.00
Wholesale power demand charges:	\$ 7.00	\$ 5.00
Distribution delivery demand charges:	\$ 7.00	\$ 7.00
Energy Charges:		
All kWh's	4.52 ¢	4.70 ¢

DETERMINATION OF BILLING DEMAND

Measured Demand shall be the maximum kilowatt demand established by the consumer for any period of fifteen consecutive minutes during the month for which the bill is rendered, as indicated or recorded by a demand meter and adjusted for power factor as provided below.

The Billing Demand is the measured monthly demand.

POWER FACTOR ADJUSTMENT

The consumer agrees to maintain unity power factor as nearly as practicable. Demand charges will be adjusted for to correct for average power factors lower than 95%, and may be so adjusted for other consumers if and when the District deems necessary. Such adjustment will be made by increasing the measured demand 1% for each 1% that the power factor is less than 95% lagging.

MINIMUM MONTHLY CHARGE

The minimum monthly charge shall be the highest one of the following charges as determined for the consumer in question:

- (1) The minimum monthly charge specified in the contract for service.
- (2) A charge of \$1.00 per KVA of installed transformer capacity.
- (3) The customer charge of \$50.00.

SERVICE PROVISIONS

(1) Delivery Point: If service is furnished at secondary voltage the delivery point shall be the metering point unless otherwise specified in the contract for service. All wiring, pole lines and other electric equipment on the load side of the delivery point shall be owned and maintained by the consumer.

If service is furnished at Seller's primary line voltage the delivery point shall be the point of attachment of Seller's primary line to the consumer's transformer structure unless otherwise specified in the contract for service. All wiring, pole lines and other electric equipment (except metering equipment) on the load side of the delivery point shall be owned and maintained by the consumer.

(2) Lighting: Both power and lighting shall be billed at the foregoing rate when sold through the same meter.

(3) Primary Service: If service is furnished at primary distribution voltage, a discount of 5 percent (5%) shall apply to the demand and energy charges, and if the minimum charge is based on transformer capacity, a discount of five percent (5%) shall also apply to the minimum charge. However, the Seller shall have the option of metering at secondary voltage and adding the estimated transformer losses to the metered kilowatt-hours and kilowatt demand.

TERMS OF PAYMENT

Penalty dates are posted on monthly bills. The District's policies governing penalties, collection charges, and disconnection of service for non-payment shall apply.

TAX CLAUSE

In the event of the imposition of any new tax or the increase of any existing tax or any payment in lieu thereof by any lawful authority on the transmission, production or sale of electricity, the energy charge to be paid for each kilowatt-hour delivered and the charges based on demand when included in any rate may be increased by the amount of the tax.
