

They want
to put
Wall Street
in charge of
my
electric bill?

Congress is debating a plan to put Wall Street in charge of reducing carbon emissions from the power plants that serve Nebraska. It's called "cap and trade."

And yes, it would be expensive, complicated, and wasteful - and would raise your monthly electric bill substantially.

There are better, cost-effective ways to solve the problem, including finding new ways to conserve electricity or use it more efficiently, using a sensible approach to wind energy and renewables, and adding more low-emission power plants. Teaming with our power supplier, we're working on them all.
